Governance, Multinationals And Growth

Edited by Lorraine Eden, Professor of Management, Mays Business School, Texas A&M University, US and Wendy Dobson, Professor and Director, Institute for International Business, Joseph L. Rotman School of Management, University of Toronto, Canada

2005 400 pp Hardback **1 84376 909 3** \$130.00 (web price \$117.00)

In *Governance, Multinationals and Growth*, leading scholars celebrate and build upon the pioneering work of Edward Safarian on multinational enterprises and foreign direct investment. The book explores the linkages among multinationals and foreign direct investment, corporate and public governance, and economic growth. The contributors pay particular attention to emerging policy issues that include the behavior of individual governments, intergovernmental organizations and civil society. In addition, they address linkages among MNEs, their governance and economic growth, and generic policy realities (and innovations) in a small-to-medium-sized economy.

Contents: Foreword by Peter J. Buckley Part I: Introduction Part II: Corporate Governance, Multinationals and Growth Part III: Free Trade, Multinationals and Growth Part IV: Public Governance, Multinationals and Growth Part V: Conclusions Index
